## PROFILE

I am currently pursuing my undergraduate degree in Computer Science at Universitas Negeri Semarang. Driven by a strong passion for programming, I am eager to secure an internship position to further develop my expertise in the field. My academic journey has provided me with a solid foundation in various programming languages, software development, and web development, and I am enthusiastic about applying and expanding these skills in a practical, real-world setting through an internship.

---

## EDUCATION

### Universitas Negeri Semarang

(2021-2025)(Expected)

Undergraduated in Computer Science - GPA: 3,58/4,00

- Relevant courses: Information Technology Research, Object Oriented Programming, Software engineering ,and Web Development.

### SMA N 44 JAKARTA

(2018-2021)

Natural Science

---

## EXPERIENCES

### LearningX - Essential Programming Course Fullstack Web

(August 2023 – December 2023)

The Essential Programming Course is a practical learning experience focused on website development, covering the entire process from front-end to back-end.

- Acquired comprehensive knowledge of fundamental web development, covering both front-end and back-end aspects.
  - Executed assignments encompassing the development of a to-do list mini project, a fan book page, and web scraping exercises.
  - Contributed to the final project within a three-member team, concentrating on design and front-end development, providing valuable insights into effective teamwork and project management.
- 

## PROJECTS

### The Library – Group Project

(August 2023)

#### Front-end Developer / Final Project From LearningX Course

The Library is an online library website that we created using HTML, CSS, Flask, Bootstrap, and others.

- Developed "The Library," an online platform for library, as the final project for the LearningX Course.
- Implemented genre-based filtering, allowing users to explore books by their preferred genres, integrated a bookmarking features for users to save and revisited their books and full CRUD functionality.
- Specialized in front-end development and design aspects of the project and Ensured an intuitive and visually appealing user interface, focusing on the user experience.
- Feel free to explore the website I developed by visiting: <https://the-libraryk1.glitch.me/>

### The Sweeter – Individual Project

(November 2023)

#### Mini Project From LearningX Course

The Sweeter is a mini website project for posting tweets, akin to Twitter, implementing concepts learned in the LearningX Course.

- Built a miniproject called "The Sweeter," a microblogging platform reminiscent of Twitter and

deploy to the glitch.

- Allowing users to post tweets seamlessly on the platform and implemented user authentication, permitting users to login, register, and edit their profiles.
- Prioritized an intuitive and responsive user interface for an enhanced user experience and ensured smooth functionality for posting tweets and managing user profiles.
- Take a moment to explore the website I created: <https://ahnaf-sweeter.glitch.me/>

### **Riset Teknologi Informasi**

**(June 2023)**

#### **Course in Universitas Negeri Semarang**

*The course "Information Technology Research" outlines an understanding of journal creation based on artificial intelligence models researched by students themselves*

- Research on detect abusive and offensive language on social media platforms, achieving a notable 95% model accuracy using a Logistic Regression Algorithm with Python programming language and Google Colab tools.
- In building based model with the python programming language and Google Collaboratory as a tool, it succeeded in getting 95% model accuracy.

### **Rekayasa Perangkat Lunak**

**(June 2023)**

#### **Course in Universitas Negeri Semarang**

*Project of "software engineering" is to create a cooperative website for administration*

- Collaborated with a team to develop a cooperative website for efficient administration processes.
- Implemented features such as member registration, transaction tracking, and document management.
- Utilized HTML, CSS, JavaScript, PHP and Laravel to create a user-friendly interface.

---

## **SKILLS**

- |              |                       |
|--------------|-----------------------|
| • HTML       | • AJAX                |
| • CSS        | • Git/GitHub          |
| • Flask      | • Web Design          |
| • MongoDB    | • Figma               |
| • Javascript | • Bootstrap and Bulma |
| • jQuery     | • English (Fluent)    |
